

Date Format

The "**Date Format**" field defines how dates will be represented in the exported CSV file. The system offers five distinct formats to adapt to different geographical needs and software compatibility requirements.

The image shows a user interface element titled "Formato Data". It features a dropdown menu currently displaying "d-m-Y". The dropdown is open, revealing five options: "d-m-Y" (highlighted), "Y-m-d", "d/m/Y", "m/d/Y", and "Y/m/d".

The "d-m-Y" (day-month-year) format standardizes date representation according to the European format. This setting ensures consistency in date display and facilitates data processing by analysis software or spreadsheets configured for the Italian format.
